

KodeKLIX for PUP

Other Application Ideas

Non-Gaming Applications

- PUP is more than a gaming console
- It's a portable device adaptable to other control or interfacing needs
- *Hardware Interfacing* Guide will focus on some of the electrical aspects
- This guide will focus on the Application side of non-gaming projects

Non-Gaming Ideas

- Remote controller
- Data recorder / logging device
- Test tool / Instrument
 - Pulse generator
 - Frequency counter
 - Voltage Logic Probe
- Sound synthesizer / playback
- Personal Information Databank
- “Brain” for a robotics project
